

Added a facebooklogin dog box here , but it gives the below error

Given URL is not allowed by the Application configuration.: One or more of the given URLs is not allowed by the App's settings. It must match the Website URL or Canvas URL, or the domain must be a subdomain of one of the App's domains.

[https://www.facebook.com/v2.0/dialog/oauth?scope=public\\_profile%2Cemail&response\\_type=none&redirect\\_uri=https%3A%2F%2Fwww.facebook.com%2Fdialog%2Freturn%2Ffb%3Frelation%3Dopener%26close%3Dtrue%23origin%3Dhttps%253A%252F%252Flocalhost%253A8080%252Ff24a743f9c&seen\\_revocable\\_perms\\_nux=false&ref=LoginButton&auth\\_type=&default\\_audience&state=f1d9a49248&app\\_id=584373341680877&client\\_id=584373341680877&display=popup](https://www.facebook.com/v2.0/dialog/oauth?scope=public_profile%2Cemail&response_type=none&redirect_uri=https%3A%2F%2Fwww.facebook.com%2Fdialog%2Freturn%2Ffb%3Frelation%3Dopener%26close%3Dtrue%23origin%3Dhttps%253A%252F%252Flocalhost%253A8080%252Ff24a743f9c&seen_revocable_perms_nux=false&ref=LoginButton&auth_type=&default_audience&state=f1d9a49248&app_id=584373341680877&client_id=584373341680877&display=popup)

If you get the above Error . Then go to your Facebook dashboard click on settings.( The wheel) and click on “+AddPlatform”  
The below disalogbox will appear

In this dialog box select website as is our case.  
Then give the site Url as <http://localhost:8080/sso> as given in the below snapshot
